

Installation Guide

The Tradingview EA needs to make Webrequest to my Azure Blob Storage, for that to work you need to add following URLs under **Tools -> Options -> Expert Advisors**

You need to add following URLs:

- ➔ <https://codingedgeroot.blob.core.windows.net/>
- ➔ https://codingedgeroot.blob.core.windows.net/tradingview-ea-eurusd/EURUSD_analysis.csv
- ➔ https://codingedgeroot.blob.core.windows.net/tradingview-ea-usdjpy/USDJPY_analysis.csv
- ➔ https://codingedgeroot.blob.core.windows.net/tradingview-ea-gbpcad/GBPCAD_analysis.csv

For the License you also need to add these URLs, if you don't have a License yet for the EA, you need to create a Trading Account over one of our Affiliate Links at our Partner Broker. After that you can fill out the Forum on our Website with the registered Email and the Account number, we will activate then your License.
